

GLOBAL SPARE PARTS GUIDE 2023

PROGRAMS 2023

ONLINE TRAINING PROGRAM

Aqua Lung offers online training courses at <https://training.aqualung.com/login/index.php>

Successful completion of a course results in a printable wall certificate acknowledging the store or technician and provides access to repair manuals, associated schematics, bulletins and resource materials.

BENEFITS:

- Online courses serve as a qualification program and an up-to-date reference source
- Training can take place anytime 24/7 and anywhere the internet is available
- Each course contains multimedia, text, photos, illustrations and videos and can be paused and resumed as needed with knowledge retention measured by quizzes along the way
- After the course has been successfully completed, the student may return as often as they wish as long as they remain employed by an Aqua Lung dealer.
- Allows Aqua Lung to communicate directly with service department personnel
- Affordable, the \$25.00 to \$40.00 per course fee can be recovered by servicing just one regulator. (discounted multi-course packs available)
- Also available are no charge product training/information courses for sales staff.

TABLE OF CONTENTS

How to Use the Spare Parts Catalog & Price List	5	Flat E-Valve.....	57
FIRST STAGES (Current Models)		Powerline Inflator	58

Tag-Valve • Z-Valve w/Insert 230 Bar	53		
AIRSOURCE & INFLATORS			
Airsource 3.....	55		
i3 Inflator & Oral Assembly.....	56		

HOW TO USE THE SPARE PARTS GUIDE & PRICE LIST

The Spare Parts Guide is designed to be an easy-to-use reference for locating currently available part numbers for most Aqualung products, including regulators, BCs, valves, instruments and rubber goods. It is not intended to be a substitute for the various Aqualung Repair Manuals. Because the schematic drawings and parts listed contain the most recent revisions to the products shown, this document should be referred to exclusively whenever ordering replacement parts.

Finding the part number and price

There are three simple steps for finding a part number and its price:

- Find the product in the Table of Contents of this catalog and turn to the appropriate page.
- Find the part in the exploded drawing and note the key number. Find the key number in the parts listing located below the exploded drawing. Next to the key number is the part number.
- Refer to the **Spare Parts & Specialty Tools Price List**, and locate the part number. Next to the part number is the dealer price and retail price.

Mandatory overhaul replacement parts

Some products have mandatory overhaul replacement parts, which should be replaced every time the product is serviced. Any part in **BOLD ITALICS** is considered a mandatory overhaul part, and should not be reused under any circumstances after the product has been disassembled. These parts can be ordered individually, or in complete kits which are available for each model regulator.

Parts no longer available (NLA)

Some older, discontinued products have parts that are no longer available. If a part was never or no longer available, the letters NLA will replace the part number in the parts list.

Parts no shown (N/S)

Part are available but not shown on the schematic.

Using the Part Number Index

If you know the part number for a specific item and want to find where it is used (or isn't used), you will want to use the Part Number Index. To use the index, you first need to locate the part number in the listing. Next to each part number are the page numbers on which the part can be found. If, for example, you want to know what products use the RG912198 medium pressure seat, you can refer to the Part Number Index, where you will find the pages to the products that use RG912198.

A Reminder

Parts may only be sold to Authorized Aqualung Pro-Line Dealers, and must be installed only by technicians who have received factory authorized training. Proper storage is important to ensure the quality of these parts. Be sure to store parts in a manner to prevent premature degradation of rubber and other soft materials, and to prevent damage to those parts which contain delicate sealing surfaces.

PRODUCTION DATE & SERIAL NUMBER IDENTIFICATION GUIDE

In order to identify the production year or model generation for an Aqualung / Apeks product, it is necessary to note the serial number of the specific product in question.

Serial Number Information: **IMPORTANT**

Serial numbers DO NOT contain the letters “EN” or “CE”. These numbers refer to a European Standard for that product. If you cannot locate your serial number, please refer to the following information for assistance.

AQUALUNG/APEKS REGULATORS

For Aqualung and Apeks regulators, the serial number of the first and second stage of a complete regulator is identical. Octopus and Partner sets show individual serial numbers and must be treated individually.

Serial Number Location:

- **1st stage** - The 7-digit serial number is readily visible on the first stage.
- **2nd stage** - The serial number is laser etched into the 2nd stage case. The location varies by model.
- **Airsource3** - The serial number is located just above the exhaust valve and always starts with a letter followed by 5-digits then 2-letters again (example: R01030MN).

Production Date Identification:

- **Aqualung Regulators From 2000 - 2009** The first digit of the serial number indicates the production year
From 0 to 9 = 2000 to 2009:

0 for 2000
1 for 2001
2 for 2002
3 for 2003
4 for 2004

Example: Serial Number 6062501 the year of manufacturing is **2006**

- **Aqualung Regulators After 2010** A letter marks the production year
From 2010 Forward:

A for 2010
B for 2011
C for 2012
D for 2013
E for 2014

Example: Serial Number J012401 with J being the 10th letter of the alphabet, the year of manufacturing is **2020**

- **Airsource3 - 2014 to Present:** A letter marks the production year. Starting with “Y” for year 2014 and then starting over at “A” for 2016. The next 5-numbers are the unit production number for the year

Y for 2014
Z for 2015
A for 2016
B for 2017
C for 2018

Example: Serial Number B12401MN

B=Year 2017

12401=The production sequence number for 2017.

- **Apeks Regulators From 2000 to Present:** The first two digits of the serial number indicates the production year: While the second two digits indicate the month. The remaining 4-5 numbers are sequential numbers.

00 for 2000
01 for 2001
02 for 2002
03 for 2003
04 for 2004

Example: Serial Number 200612345

20 = year 2020

06 = June

AQUALUNG DIVE COMPUTERS

In order to identify the production year or model generation for an Aqualung product, it is necessary to note the serial number of the specific product in question.

Serial Number Location:

Serial numbers are located on the outside of the box from each product, on the back of each product and also in the sub-menu from each product.

Production Date Identification:

- The first digits of the serial number indicates the production month, followed by the second two digits indicating the year and thereafter a sequential number

Examples:

918013364 for September 2018

117009678 for January 2017

217015030 for February 2017

416002341 for April 2016

516003109 for May 2016

BUOYANCY COMPENSATORS (BCD'S)

Serial Number Locations:

- The Warning tags have both the S/N and LOT# on them. They are located in several locations. Under the back pad of the BC, they can also be located inside the BC pocket.
- Earlier Sea Quest and Aqualung BCs have a serial number tag is located behind the hook-and-loop inflator hold down on the left shoulder. This does not have the LOT# on it.
- 1st generation Wave - It does not have a serial number. Use the LOT number located at the bottom of the Warning tag located in the BC pocket.

Production Date Identification:

The LOT# is what is used to read the date code. The attached image shows the LOT# 12086AD001. We want to look at the first 5 numbers to identify the year and day of manufacture.

Example: Lot# 12086AD001

12 = year 2012

086 = 86th day of the year (Julian calendar), March 26th

This is the same method for all buoyancy products. If it has a Warning label, it has a LOT# which identifies the manufacturing date.

AQUALUNG

FIRST STAGES

Leg3nd 2020-Present

KEY#	PART#	DESCRIPTION
-----	RA121139	Overhaul Parts Kit ACD (Yoke and DIN)
-----	RT146000	First Stage Leg3nd ACD, Yoke

LEG3ND

RA119117 ---DIN ACD Conversion Kit

HELIX PRO • HELIX COMPACT PRO

RA119123 ---DIN ACD Conversion Kit, Helix Pro, Helix Compact Pro

HELIX • HELIX COMPACT

RA119118 ---DIN Conversion Kit, Helix, Helix Compact
 RA119123 ---DIN ACD Conversion Kit, Helix, Helix Compact

TITAN

RA119118 ---DIN Conversion Kit, non-ACD, Titan (2013>)
For use on Titan with body loaded filter. (See Technical Bulletin #38)
 RA119123 ---DIN ACD Conversion Kit, Core/Titan (2013>)
Converts non-ACD Titan in Yoke or DIN to ACD DIN
For use on current Titan with body loaded filter. (See Technical Bulletin #38)
 RA119114 ---DIN Conversion Kit, non-ACD, Titan (2010-12)
For use on Titan with inlet fitting loaded filter. (See Technical Bulletin #38)
 RA119113 ---DIN ACD Conversion Kit, Titan (2010-12)
Converts non-ACD Titan in Yoke or DIN to ACD DIN
For use on Titan with inlet fitting loaded filter. (See Technical Bulletin #38)

CALYPSO

RA119116-----ACD Conversion Kit (for Yoke)
 RA119112-----DIN Conversion Kit, 200bar 2010>(non-ACD) **N/A USA**

DISCONTINUED MODELS**LEGEND**

RA119117 ---DIN ACD Conversion Kit, Legend ACD (2013>)
For use on Legend with body loaded filter (See Technical Bulletin #38)
 RA119113 ---DIN ACD Conversion Kit, Legend Series (<2012)
This is for the Legend series prior to the new filter placement. (See Technical Bulletin #38)

MIKRON ACD • CORE • TITAN LX

RA119123 ---DIN ACD Conversion Kit, Mikron ACD, Core, Titan LX ACD
 (2013-14) *For use on Titan LX with body loaded filter. (See Technical Bulletin #38)*
 RA119113 ---DIN ACD Conversion Kit, Titan LX ACD (2009-12)
For use on Titan LX with inlet fitting loaded filter. (See Technical Bulletin #38)

MIKRON

RA119118 ---DIN Conversion Kit, non-ACD, Mikron (2013>)
For use on Mikron with body loaded filter. (See Technical Bulletin #38)
 RA119114 ---DIN Conversion Kit, non-ACD, Mikron (2010-12)
For use on Mikron with inlet fitting loaded filter. (See Technical Bulletin #38)

RA119111-----DIN to Yoke Converter

GLOBAL SPARE PARTS GUIDE 2023

PROGRAMS 2023

ONLINE TRAINING PROGRAM

Aqua Lung offers online training courses at <https://training.aqualung.com/login/index.php>

Successful completion of a course results in a printable wall certificate acknowledging the store or technician and provides access to repair manuals, associated schematics, bulletins and resource materials.

BENEFITS:

- Online courses serve as a qualification program and an up-to-date reference source
- Training can take place anytime 24/7 and anywhere the internet is available
- Each course contains multimedia, text, photos, illustrations and videos and can be paused and resumed as needed with knowledge retention measured by quizzes along the way
- After the course has been successfully completed, the student may return as often as they wish as long as they remain employed by an Aqua Lung dealer.
- Allows Aqua Lung to communicate directly with service department personnel
- Affordable, the \$25.00 to \$40.00 per course fee can be recovered by servicing just one regulator. (discounted multi-course packs available)
- Also available are no charge product training/information courses for sales staff.

-------------------	----

HOW TO USE THE SPARE PARTS GUIDE & PRICE LIST

The Spare Parts Guide is designed to be an easy-to-use reference for locating currently available part numbers for most Aqualung products, including regulators, BCs, valves, instruments and rubber goods. It is not intended to be a substitute for the various Aqualung Repair Manuals. Because the schematic drawings and parts listed contain the most recent revisions to the products shown, this document should be referred to exclusively whenever ordering replacement parts.

Finding the part number and price

There are three simple steps for finding a part number and its price:

- Find the product in the Table of Contents of this catalog and turn to the appropriate page.
- Find the part in the exploded drawing and note the key number. Find the key number in the parts listing located below the exploded drawing. Next to the key number is the part number.
- Refer to the **Spare Parts & Specialty Tools Price List**, and locate the part number. Next to the part number is the dealer price and retail price.

Mandatory overhaul replacement parts

Some products have mandatory overhaul replacement parts, which should be replaced every time the product is serviced. Any part in **BOLD ITALICS** is considered a mandatory overhaul part, and should not be reused under any circumstances after the product has been disassembled. These parts can be ordered individually, or in complete kits which are available for each model regulator.

Parts no longer available (NLA)

Some older, discontinued products have parts that are no longer available. If a part was never or no longer available, the letters NLA will replace the part number in the parts list.

Parts no shown (N/S)

Parts are available but not shown on the schematic.

Using the Part Number Index

If you know the part number for a specific item and want to find where it is used (or isn't used), you will want to use the Part Number Index. To use the index, you first need to locate the part number in the listing. Next to each part number are the page numbers on which the part can be found. If, for example, you want to know what products use the RG912198 medium pressure seat, you can refer to the Part Number Index, where you will find the pages to the products that use RG912198.

A Reminder

Parts may only be sold to Authorized Aqualung Pro-Line Dealers, and must be installed only by technicians who have received factory authorized training. Proper storage is important to ensure the quality of these parts. Be sure to store parts in a manner to prevent premature degradation of rubber and other soft materials, and to prevent damage to those parts which contain delicate sealing surfaces.

PRODUCTION DATE & SERIAL NUMBER IDENTIFICATION GUIDE

In order to identify the production year or model generation for an Aqualung / Apeks product, it is necessary to note the serial number of the specific product in question.

Serial Number Information: **IMPORTANT**

Serial numbers DO NOT contain the letters “EN” or “CE”. These numbers refer to a European Standard for that product. If you cannot locate your serial number, please refer to the following information for assistance.

AQUALUNG/APEKS REGULATORS

For Aqualung and Apeks regulators, the serial number of the first and second stage of a complete regulator is identical. Octopus and Partner sets show individual serial numbers and must be treated individually.

Serial Number Location:

- **1st stage** - The 7-digit serial number is readily visible on the first stage.
- **2nd stage** - The serial number is laser etched into the 2nd stage case. The location varies by model.
- **Airsource3** - The serial number is located just above the exhaust valve and always starts with a letter followed by 5-digits then 2-letters again (example: R01030MN).

Production Date Identification:

- **Aqualung Regulators From 2000 - 2009** The first digit of the serial number indicates the production year
From 0 to 9 = 2000 to 2009:

0 for 2000
1 for 2001
2 for 2002
3 for 2003
4 for 2004

Example: Serial Number 6062501 the year of manufacturing is **2006**

- **Aqualung Regulators After 2010** A letter marks the production year
From 2010 Forward:

A for 2010
B for 2011
C for 2012
D for 2013
E for 2014

Example: Serial Number J012401 with J being the 10th letter of the alphabet, the year of manufacturing is **2020**

- **Airsource3 - 2014 to Present:** A letter marks the production year. Starting with “Y” for year 2014 and then starting over at “A” for 2016. The next 5-numbers are the unit production number for the year

Y for 2014
Z for 2015
A for 2016
B for 2017
C for 2018

Example: Serial Number B12401MN

B=Year 2017

12401=The production sequence number for 2017.

- **Apeks Regulators From 2000 to Present:** The first two digits of the serial number indicates the production year: While the second two digits indicate the month. The remaining 4-5 numbers are sequential numbers.

00 for 2000
01 for 2001
02 for 2002
03 for 2003
04 for 2004

Example: Serial Number 200612345

20 = year 2020

06 = June

AQUALUNG DIVE COMPUTERS

In order to identify the production year or model generation for an Aqualung product, it is necessary to note the serial number of the specific product in question.

Serial Number Location:

Serial numbers are located on the outside of the box from each product, on the back of each product and also in the sub-menu from each product.

Production Date Identification:

- The first digits of the serial number indicates the production month, followed by the second two digits indicating the year and thereafter a sequential number

Examples:

918013364 for September 2018

117009678 for January 2017

217015030 for February 2017

416002341 for April 2016

516003109 for May 2016

BUOYANCY COMPENSATORS (BCD'S)

Serial Number Locations:

- The Warning tags have both the S/N and LOT# on them. They are located in several locations. Under the back pad of the BC, they can also be located inside the BC pocket.
- Earlier Sea Quest and Aqualung BCs have a serial number tag is located behind the hook-and-loop inflator hold down on the left shoulder. This does not have the LOT# on it.
- 1st generation Wave - It does not have a serial number. Use the LOT number located at the bottom of the Warning tag located in the BC pocket.

Production Date Identification:

The LOT# is what is used to read the date code. The attached image shows the LOT# 12086AD001. We want to look at the first 5 numbers to identify the year and day of manufacture.

Example: Lot# 12086AD001

12 = year 2012

086 = 86th day of the year (Julian calendar), March 26th

This is the same method for all buoyancy products. If it has a Warning label, it has a LOT# which identifies the manufacturing date.

REGULATORS

MTX-R SIDEMOUNT

2021-Present

MTX-R Sidemount Regulator Accessories

PART#	DESCRIPTION
-------	-------------

RT127111	MTX-R First Stage only, w/DIN
