

## *CAVE CONE SEAT*

Scubapro Engineering has recently changed materials on the Cave Cone Seats P/N 10-101-151 and P/N 10-200-107. The new Seats are a transparent cherry red color. The Seats were phased into production January 22, 1991.

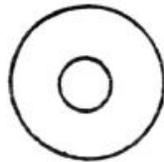

The new Seat is slightly tougher than previous Seats. All previous Seats are still usable and meet our high standards.

Scubapro uses color identification tracking of some component parts when materials or revision changes are made. As new materials are developed and tested, we will continue to make improvements.

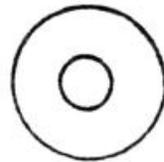

The following will assist you in identifying the series of Cave Cone Seats, based on the color identifications.

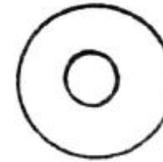

Seat 1  
Amber

Seat 2  
Blue

Seat 3  
Ivory

Seat 4  
Red
