

ColdFusion Lighting System New for 2008, the latest technology in LEDs can now produce brightness equal to a 10 watt HID!

Latest Li-Ion Battery technology produces 100% power high beam for 5 hours and 50% low beam for 10 hours. Plus a locator beacon.

The solid state construction and machined aluminum housing make for an indestructible and very reliable light system.

- 9 watt LEDs with digital controller produces the same brightness as 10watt HID.
- Li-Ion Battery with 5 hrs burn time on high beam, 10 hrs low beam.
- Machined Aluminum Headlamp and Canister Battery Case.
- Goodman Handle standard.

ColdFusion Field System Our new ColdFusion headlamp with our new Field system Battery.

The canister type Field System Battery uses 5 ea D Cell Batteries for those situations where charging is not an option and extra long burn times are needed.

Burn times with Alkaline Batteries are 7 hours at 100% power, 14 hours at 50% power. Also can be used with Ni Cad or NiMH rechargeable batteries.

- 9 watt LEDs with digital controller produces the same brightness as 10watt HID.
- Machined Aluminum Headlamp and Cannister Battery Pack holds 5 each D Cell Batteries (not included).
- Goodman Handle standard.
