

DS3 Features and Benefits

Features

Benefits

Neck Seal	The over dipped latex neck seal is proprietary formulated for strength and elasticity.
Zipper Cover	A Cordura cover with a large coil zip protects the dry zipper.
Front Entry	The DS3 incorporates an around neck front entry that is comfortable and very streamlined. Our patented design is very streamlined and offers effortless self-donning with total range of upper arm movement.
Exhaust Valve	Adjustable pressure exhaust with ratchet bezel. Valve can be installed anywhere at customer request
Intake Valve	Swivel intake with BC style inflate hose. Valve can be installed anywhere at customer request.
Underarm Panel	Our design incorporates an underarm panel for better fit and stress relief.
Wrist Seals	The over dipped latex wrist seals are proprietary formulated for strength and elasticity.
Seams	All seams are double security stitched and taped on the inside for an extended, dry life. The tape can be removed and replaced for long term maintenance or alteration.
Inside Leg/Crotch Panel	A one piece pant panel that is inserted on the inside leg starting at the boot and extending through the crotch and down to the other boot. The panel improves fit, relieves stress in crotch, and eliminates a center inside leg seam which is in a high chafe area.
Insulated Boots	The boots have a 5mm foam neoprene liner that provides unbelievable warmth with an outer of vulcanized rubber for durability.
