Description FAQ

## FEATURES

The Dual locking system requires little effort to lock it in place, while making it almost impossible to be unlocked by accident, and it will take only a second to open if needed for a battery change.

The flash trigger can translate the electric signal from the camera into light signal, with an extremely long battery life of 10,000 triggers on only two CR2032 batteries.

Extension ring/Port can be safely locked in place with the built-in locking system on the housing with one simple click

A 50kg force is applied to secure the camera with the design of the quick release plate, while being extremely convenient to operate.

### Technical Specifications

Material: Anodized Aluminum Alloy

Dimensions: 335mm(W) x 177mm(H) x 130mm(D)

Weight In Air: 2.86kg

Depth Rating: 100m
