

The North Shore Frogmen's Club Presents:

"DEEP WRECK HUNTING" with Side Scan Sonar by Garry Kozak

Thursday, November 13th, 2008

Garry has worked for L-3/Klein for 27 years, traveling the world as a recognized expert in side-scan-sonar operation and its varied applications. He has trained more than 20 navies in side-scan, countless law enforcement agencies, as well as performed many search and survey operations around the globe. He started in the 70's as a commercial diver, and has a particular love for shipwrecks. His unique take on what this technology is capable of is confirmed by his extensive diving experience tied closely to side-scan-sonar. You will see some amazing images in his presentation coupled with very interesting background information and stories about them.

Mark your calendars for November 13. Discover technical advances in "Side Scan Sonar". This will be a fascinating multi-media lecture on its uses in deep shipwreck discovery and marine salvage operations.

	communications Klein Associates, Inc.	KLEIN ASSOCIATES INC.	Klein Associates, Inc. is a leading sensor technology company, which provides high-resolution sonar systems, marine navigation systems and intrusion detection systems.
