

### SPORTSWAYS-WATERLUNG

#W-300J Patent #3,147,761 Patent #195,070

A regulator that takes along its reserve. The spring loaded First Stage reserve mechanism automatically gives you a built-in "J" valve. Features an adjustable diaphragm, fully balanced First Stage and reserve mechanism of stainless steel. Space Age Second Stage.

#W-300J . . . \$145.00

### SPORTSWAYS-WATERLUNG

#### Sport Diver V

The most widely imitated regulator in SCUBA. First designed in 1958, the Sport Diver has been constantly upgraded to remain unmatched in simplicity and service. Features a fully balanced, adjustable diaphragm First Stage that delivers maximum air with a minimum of effort. Space Age Second Stage.

#1303 . . . \$130.00

### SPORTSWAYS-WATERLUNG

#### #ATM-500C

The 500C features a pre-set piston construction with a unique teflon wiper backing up the "O" ring seal to assure no foreign particles can enter. A reversible and replaceable teflon high pressure seat delivers long life and an extremely low maintenance factor. Space Age Second Stage.

#1390 . . . \$100.00

### SPORTSWAYS-WATERLUNG #W-200

An outstanding SCUBA regulator since we introduced its special features in 1972. The First Stage is a masterpiece of efficiency and simplicity. Only one moving part in the entire mechanism. A fully balanced flow through piston of stainless steel with special teflon wiper backing up the "O" ring seal, plus reversible and replaceable teflon high pressure seat. Three low pressure ports on the end cap mean you can add a complete SCUBA system to the versatile First Stage. Space Age Second Stage.

#W-200 . . . \$135.00
