From the beach guests have access to unlimited shore diving night or day on 3 of the best south side dive sites.

Scuba diving on Utila is rich and varied with more than 130 buoyed sites around the island. The North side of Utila has the second largest barrier reef in the world with walls dropping to over 1,000 meters. The South side of Utila consists mainly of shallow fringing reefs, the top of the reef at around 5 meters dropping down to between 30 & 40 meters. Then of course during the surface intervals the search for whale sharks is on. Scuba diving heaven!!
