IMPORTANT!

QUICK RELEASE WEIGHT VEST INSTRUCTIONS

STEP 1) It is easiest to put the weight vest on in "**temporary mod**e" as shown to the right.

NOTE: This configuration **DOES NOT** offer a quick release option and is NOT for diving!

Buckling your straps in this configuration is only to assist in putting the vest on before your dive.

Temporary Putting On Mode
DO NOT DIVE LIKE THIS

STEP 2) Once the vest is on, disconnect the buckles from the "temporary mode" and then reconnect as shown to the right **"dive mode".**

The **"dive mode"** configuration is the correct way to dive with a weight vest, enabling a quick release.

Safe to Dive Mode
